Data analytics consultant who builds and validates the full pipeline, from SQL sourcing and KPI definition to Power BI dashboards and machine learning models. Creator of sports analytics projects including a PGA Tour prediction platform with rigorously backtested accuracy. Combining enterprise consulting discipline with a lifelong focus on sports data.

TECHNICAL SKILLS

Languages & Tools: SQL (AWS Redshift), Python (scikit-learn, pandas, FastAPI), R, TypeScript/React, Power BI, Tableau, Excel

Analytics & ML: Predictive Modeling, Gradient Boosting, Probability Calibration, Backtesting, NLP (BERT), Regression Analysis

Platforms: Azure, Fly.io, Streamlit, GitHub Actions (CI/CD), Salesforce Marketing Cloud, Google Analytics

PROFESSIONAL EXPERIENCE

NTT DATA — Data Analytics & AI Consultant

Aug 2024 – Present

Client Engagement: National Home Services Franchise Network — Atlanta, GA (Jan 2026 – Present)

- Own the KPI Data Availability Matrix for ~55 business KPIs, partnering with Finance, Revenue Operations, and Engineering to determine for each franchise which metrics have reliable data and prioritize which need work first
- Oversee a consumer financing Power BI dashboard tracking loan volume and revenue across six lending partners, maintaining the merchant mapping data that attributes financing revenue to the correct brand and franchise territory
- Write and validate SQL against AWS Redshift to source KPIs for 14 franchise health dashboards in Power BI
- Interviewed 10-15 stakeholders across 12 franchise brands to map each brand's lead-to-retention sales process, creating standardized funnel diagrams that feed KPI development and brand onboarding
- Ramped up on a five-system enterprise data environment (ServiceTitan, Successware, NetSuite, FranConnect, Redshift) in the first weeks of the engagement, helping keep discovery work and month-end finance reporting on track during a consultant transition

Prior Rotations/Engagements: AI Engineer / Digital Transformation Consultant (Aug 2024 – Jan 2026)

- Won 1st place in NTT DATA's North American AI Hackathon on a 3-person team, building an LLM evaluation framework and pitching it to the company's Global CEO
- Developed BERT-based NLP sentiment models for a bank call-center complaint classification solution, presenting a live demo to senior leadership
- Supported development of agentic AI proof-of-concept solutions on Azure for public-sector clients and built internal Streamlit tools that accelerated RFP response generation
- Led quality assurance for standardizing ~500 legacy technical diagrams, tracking progress and delivering weekly status reports across a milestone-driven client engagement

ADDITIONAL EXPERIENCE

PlayOn! Sports — Marketing Technology Intern

Summer 2023

- Built 2 machine learning models in Python and R to predict sporting event outcomes, working alongside marketing technology engineers
- Analyzed millions of rows of customer data across the NFHS Network and GoFan platforms to improve email retention and digital marketing performance

Miami Heat — Retail Operations Intern

Summer 2022

- Pitched a revenue-generating arena renovation proposal to Heat executive staff as part of a 10-intern team
- Supported warehouse and e-commerce fulfillment operations using RetailPro and Excel

Pro Sports Outlook — Media Coordinator

Summer 2021

- Curated daily sports highlight content, selecting from hundreds of daily posts across sports media to build PSO's daily highlights

PROJECTS

PGA Tour Analytics & Prediction Platform

2026 – Present

- Built an end-to-end machine learning platform that generates calibrated probabilities for every player in a PGA Tour field across five outcome markets (win, top-5, top-10, top-20, make-cut), trained on ~35,800 player-tournament results from 2018–2026
- Proved the model reliably beats random guessing on two of five outcome markets (make-cut, top-20), using the same rigorous backtesting and confidence-interval methods professional forecasters rely on
- Ran 18 controlled feature experiments with pre-registered pass/fail gates, shipping only the ideas that improved out-of-sample accuracy (field-relative strokes-gained, model stacking) and documenting every failed experiment with its evidence
- Shipped a FastAPI/React/TypeScript app with a prediction leaderboard, a model-vs-sportsbook odds view, and a forward track record that grades predictions only on events the model never trained on

EDUCATION

University of Georgia, Terry College of Business — Athens, GA

M.S. Business Analytics — GPA: 3.9 (2024)

B.B.A. Marketing, Sports Management Minor, Business Analytics Emphasis — GPA: 3.6, cum laude (2023)
